Radiography, Associate in Applied Science	
CONTACT	
Robin Garner, Professor/ Coordinator, Radiography	
DATE UPDATED	
12/4/2025	
CREDIT HOURS	FORMAT
74	Seated (not online)

PROFESSIONAL LICENSURE NOTES
<p>Radiography is considered a primary credential by the American Registry of Radiologic Technologists. The national examination for Radiography Technologits (RT) is recognized by all 50 states.</p> <p>In some states, earning the RT certification means you're qualified to perform radiographic scans. Other states also require you to have a license, which may involve providing your credentials or taking additional exams. Check with your state board to ensure you meet all the requirements to work as a technologist.</p> <p>In states where the profession is not regulated at the state level, employers may require education and national credentials.</p> <p>Some states require that a particular body accredit the educational program. Examples of requirements (among others) may include submission of an official high school or college transcript, a Social Security number, a photo ID, driver's license, or passport. Some states require criminal background checks and fingerprinting. Final determination of individual state requirements for licensure or registry can only be confirmed by that state's governing body.</p> <p>North Carolina does not register or license personnel at the state level. Individuals are required to provide documentation to their employers, who typically require ARRT certification and registry. https://radiation.ncdhhs.gov/</p> <p>Sandhills Community College Radiography program is accredited by the Joint Review Committee on Education in Radiologic Technology. Successful completion and graduation from the SCC Radiography program will provide the student with eligibility to take the ARRT national examination for certification and registration as Radiography Technologists (RT).</p> <p>To easily find professional registry and licensure requirements in other states, visit https://www.asrt.org/main/standards-and-regulations/legislation-regulations-and-advocacy/states-that-regulate</p>
