

Immunization Policy

Revised 02/10/2014

Measles (Rubeola)

We must have documentation of one of the following:

- 2 vaccinations
- Positive antibody titer (lab report required) for Measles (Rubeola)

Mumps

We must have documentation of one of the following:

- 2 vaccinations
- Positive antibody titer (lab report required) for Mumps

Rubella

We must have documentation of one of the following:

- 2 vaccinations
- Positive antibody titer (lab report required) for Rubella

Varicella (Chicken Pox) / Optional

We must have documentation of one of the following:

- 2 vaccinations
- Positive antibody titer (lab report required)

Hepatitis B

We must have documentation of one of the following:

- 3 vaccinations
- Positive antibody titer (lab report required)
- Declination waiver. Declination waiver is available to download from this requirement.
- **Phlebotomy students cannot opt out of this requirement**

TB Skin Test

We must have documentation of one of the following:

- TB Skin test administered within the past 6 months
- If positive results, a Chest X-Ray is required.
- If the healthcare provider unable to provide the TB test due to shortage, a completed *Tuberculosis Assessment Screening* will be accepted. This document must be completed, dated and stamped by the official healthcare provider.

Tetanus, Diphtheria & Pertussis (Tdap)

We must have documentation of one of the following:

- A completed DPT primary series AND a Tdap booster within the past 10 years; OR
- A completed Td booster if the DPT primary series AND Tdap is more than 10 years old.
 - a. Renewal date will be set at 10 years from date of the Tdap or the most recent Td booster, at which time a Td booster is required.
 - b. "Any adult with an incomplete or unknown primary series of tetanus, diphtheria, or pertussis vaccines should complete a series of three doses of tetanus-diphtheria containing vaccine, one dose of which (ideally the first) should be Tdap. The recommended interval between doses 1 and 2 is at least 4 weeks, and between doses 2 and 3 is 6-12 months."

Influenza

All healthcare workers should receive an annual influenza vaccination.

- We must have the date of Influenza Vaccine.
- If you are medically deferred, please provide a copy of the Medical deferral form with note from the Medical Provider.
- **Phlebotomy students cannot opt out of this requirement**
